Technical characteristics

The exploded view below enables easy identification of the main parts making up the industrial hose reel, at the same time indicating the technical features.

As well as being **available with drum in 4 different widths,** the various hose reel models differ for:

 - type of motorisation (manual, 24V electric, 230V electric, hydraulic,

- 2" swivel joint max. pressure (20 bar
- or 70 bar)
- type and position of hose guide (available on request)
- presence or not of the clutch which regulates the hose unwinding speed.

All the models have a manual drum stop.

Adjustable clutch for correct hose unwinding.

Available on request.

Swivel joint with total passage so as not to hinder the flow.

Steel

70 bar.

Aluminium

20 bar.

OVERALL DIMENSIONS

Manual hose reel

The practical handle, connected to the external rack allows easy winding of the hose at the same time controlling its positioning on the drum. There is also an easy allocation where the handle can be stored during the un-winding operation.

Technical characteristics handle - clutch

Position of handle with cluth

The clutch is indispensable for regulating the hose unwinding speed and preventing the drum from turning empty due to inertia. The hose reel comes with the winding handle and clutch in the standard position as shown in the photo opposite.

The clutch in POM, which acts on the handle (to be used only during unwinding), creates the necessary friction on the pinion, for regulating hose unwinding speed.

New position.

Shifting the handle with clutch

If required by hose reel use, the handle and clutch can be shifted from the standard position indicated above to the position shown in the figure opposite, by means of two simple operations.

SERIES 700 ELECTRIC 24V PAINTED STEEL

The hose reels with 24V electric motor are a handy and easy answer to the problem of hose . management. Hose unwinding occurs manually whereas rewinding is done with the electric motor connected to a battery or an electrical transformer.

Hose guide, standard open high or low. This type of hose guide enables fitting of both versions (high and low) on the same hose reel, allowing hose unwinding in two opposite directions.

Technical characteristics clutch on request

Hose reel with 24V - 230V ELECTRIC - HYDRAULIC - PNEUMATIC motor

The clutch is useful during hose unwinding which is always done manually. It acts on the connection between the crown gears of the hose reel, limiting sliding. Hose unwinding speed is limited by means of the regulating knob, thereby preventing the drum from continuing to turn due to inertia.

Connection between crown gears, on which the clutch acts.

230V ELECTRIC

24V ELECTRIC

0

Clutch regulating knob.

P/N **77/2F Clutch** The clutch mounted on a freewheel bearing enables controlled unwinding of the hose, becoming neutral during rewinding.

PNEUMATIC

Wall mounting

Drill the necessary holes after choosing the ideal position, checking the solidity and thickness of the wall, marking the holes for the plugs (see template supplied with the hose reel) and ensuring that they will not pierce any plumbing pipes or electrical cables. Fix the plugs in the wall and insert the hose reel in the special seats. Tighten the 4/8 fixing nuts.

1 standard position of lifting hooks. 2 - 3 alternative positions of lifting hooks.

A - B positions of hose guides.

Fitting the hose

Before fitting, make sure the hose reel drum is locked by means of the special brake **F** (see procedures 1 – 2 – 3). Screw a Nipple **N** on the outlet elbow **G**, with sealant. Fit the hose on the Nipple **N**.

RAASM has created a wide range of industrial hose reels to meet the most complex needs in various application sectors such as: industry, agriculture, depots and refineries, mining, aviation, shipyards, fire brigades, automotive, etc.

industry, agricolture, depots and refineries, mining, aviation, shipyards, fire brigades, automotive, etc.

ADVANCED FLUID MANAGEMENT SOLUTIONS

technology, quality, functionality

The starting point for the entire production cycle is the research and development of cutting-edge new solutions which lead to the development of high quality products, fully produced in ltaly. The quality of our product manufacturing has always been our absolute priority. To reach this goal rigorous testing accompanies every phase of the manufacturing process. RAASM offers the most complete range of lubrication products suited to many sectors. Our aim is to always be available to provide solutions to our customers.

Company with quality and environment system according to ISO 9001:2015 and ISO 14001:2015 standards
